CAREER OBJECTIVE

Motivated Computer Science graduate with a strong foundation in software engineering, programming, and problem-solving. Seeking an entry-level software engineering role to contribute to impactful projects. Passionate about developing software solutions and eager to contribute while expanding my expertise in machine learning and scalable software solutions.

EDUCATION

Villanova University Graduated May 2024
B.S. in Computer Science, Minor in Cognitive Science GPA 3.40/4.0
Relevant Coursework: Software Engineering, Machine Learning, Algorithms & Data Structures

EXPERIENCE

Bristol Myers Squibb – Data Analyst Summer Intern June 2023 - August 2023

- Developed a unified data portal for supplier and retail information, streamlining workflows and enhancing accessibility for all workers
- Identified and resolved over 3,000 data discrepancies, ensuring database accuracy and reliability
- Collaborated with cross-functional teams to optimize data workflows, reducing data retrieval times
- Directed a team of interns using Agile methodologies, achieving project milestones and surpassing deadlines

PROJECTS

Machine Learning & Website Development May 2024 - Current

- Designed and trained a machine learning model using Python to recognize handwritten digits
- Integrated the model into a fully responsive website using HTML, CSS, and ReactJS, enhancing user experience with real-time interaction features
- Utilized Python for back-end processing, enhancing the website's functionality and real-time user experience

Match-3 Game August 2023 - November 2023

- Engineered a puzzle game in Unity, incorporating object-oriented programming for gameplay mechanics similar to Candy Crush
- Fostered a collaborative team environment by organizing weekly standups and using Kanban boards
- Utilized GitHub for version control to manage collaborative changes and merges effectively
- Applied CI/CD pipelines to streamline deployment and integration processes

Mobile App Development December 2022

- Developed an Android application that generates random facts based on user input, utilizing APIs for real-time data retrieval
- Collaborated with a small team to integrate internet functionalities and improve app performance

SKILLS

Programming Languages: Python, Java, JavaScript, C, C#, HTML, CSS

Development Tools: Git, AndroidStudio, Unity, ReactJS

Techniques: Agile, Kanban, Debugging, Version Control, CI/CD Pipelines

Other: Machine Learning, API Development, Database Design
